

PROFESSIONAL SUMMARY

Electronics & Telecommunication Engineering student with hands-on experience in embedded systems, ESP32, Arduino, sensor interfacing and IoT. Experienced in Wi-Fi/Bluetooth communication, GPIO interfacing, hardware-software integration, circuit simulation, prototyping, testing and troubleshooting. Strong interest in embedded firmware, communication interfaces and hardware product development.

KEY EXPERTISE

Embedded Systems | ESP32 | Arduino | C/C++ | IoT | Sensors | Wi-Fi/Bluetooth | Hardware Prototyping | Microcontrollers

EDUCATION

Dr. D. Y. Patil Institute of Technology

2023 - 2027

B.E. - Electronics & Telecommunication Engineering | CGPA: 8.05 / 10

Nowrosjee Wadia Junior College

2023

12th | MSBSHSE | Percentage: 59.33 / 100

Baby's English High School

2020

10th | MSBSHSE | Percentage: 81 / 100

INTERNSHIPS

IIT BHU Varanasi | Academics / Research

01 Jun, 2026 - 10 Jul, 2026

Internship in Digital VLSI Design

Key Skills: CMOS | Digital VLSI | RTL Design | NGSpice | Xschem | Circuit Simulation | SRAM/DRAM

- * Gained hands-on experience in Semiconductor Devices and CMOS Technology.
- * Worked with NGSpice and Xschem for circuit simulation and analysis.
- * Studied Digital VLSI Design and RTL Design concepts.
- * Gained knowledge of SRAM/DRAM memory architecture and design fundamentals.

Sujata Infotech | IT / Computers - Software

10 Jan, 2026 - 10 Feb, 2026

Field Technical Support Intern

Key Skills:

Database Management | Technical Support | Field Operation | System Monitoring | Networking | Software Troubleshooting

- * Worked as a Field Technical Support Intern, providing on-site technical assistance for real-time event monitoring systems.
- * Assisted in monitoring running events using RFID technology to accurately record candidates' timing and distance.
- * Supported database operations, ensuring accurate data entry, record management, and reliable collection of event-related information.
- * Monitored the performance of networking systems and assisted in resolving connectivity-related issues during live events.
- * Operated and troubleshooted monitoring software to ensure smooth system functionality and uninterrupted event operations.
- * Assisted in identifying technical issues, performing basic troubleshooting, and coordinating with the team for timely resolution.
- * Verified collected data and supported accurate reporting of candidates' performance and event results.
- * Gained practical experience in system monitoring, software troubleshooting, database handling, networking, and on-site technical support.
- * Worked in a team environment to maintain smooth technical operations and minimize disruptions during running events.

PROJECTS

Smart Traffic and Pollution Control

Mentor: Mrs Priyanka Wani | **Team Size:** 4

Key Skills:

Real-world Implementation Thinking Hardware-Software Integration Documentation & Presentation
Sensors Integration & Calibration Embedded Systems

This project solves the problem of fixed-timer traffic signals by using real-time traffic sensing. The system detects vehicle density using sensors/cameras and dynamically adjusts signal timings—reducing waiting time, fuel wastage, and congestion.

In addition, air purifiers and water sprinklers are installed near intersections to reduce emissions from idling vehicles, helping lower pollution on the spot.

Key Features:

- Real-time traffic density detection
- Dynamic signal timing management
- Reduced congestion & waiting time
- On-site air pollution control
- Improved traffic efficiency & greener environment

Automatic Solar Tracking And Cleaning System

Mentor: Vishakha Jadhav | **Team Size:** 4

Designed and developed a low-cost solar tracking and self-cleaning system to improve photovoltaic panel efficiency.

Integrated LDR sensors, ESP32 microcontroller, and servo motors to automatically orient the solar panel toward maximum sunlight.

Implemented an automated cleaning mechanism to remove dust and maintain consistent power output.

Improved energy generation by optimizing panel orientation and reducing efficiency losses caused by dust accumulation.

ASSESSMENTS / CERTIFICATIONS

Advanced IoT System with ESP32: Design, Implementation & Development

Provider: Dr. D. Y. Patil Institute Of Technology

This workshop provided a deep dive into IoT, automation, and embedded systems, with real-world applications and hands-on project building..

Key Learnings & Projects:

- ▣ ESP32 Programming & GPIO Interfacing – Understanding the fundamentals of microcontrollers
- ▣ Wi-Fi & Bluetooth Communication – Connecting ESP32 to networks & devices
- ▣ IoT Applications with MQTT & Web Server – Controlling and monitoring devices remotely
- ▣ Cloud Integration (Firebase & Blynk) – Sending real-time sensor data to the cloud

▣ Real-World Projects:

- ▣ Home Automation System – Controlling appliances via Wi-Fi
- ▣ IoT Weather Station – Measuring temperature, humidity & air quality
- ▣ RFID Attendance System – Secure access control using RFID

POSITIONS OF RESPONSIBILITY

Event Manager, ZION

I was part of the **Event Management** Team for "**Power Play**," hosted by **ZION** at **Dr. D.Y. Patil Institute of Technology**. With 40 teams participating, the event was a great success.

This role included planning, coordination, and **real-time problem solving** while working behind the scenes with a dedicated and hardworking team. It helped me develop **skills in leadership, teamwork, time management**, and event **execution**.

Treasurer, IEI Student Chapter

Oversaw financial management of the IEI Student Chapter, including budgeting, membership fee collection, and operational expense tracking. Collaborated with faculty coordinators for documentation, approvals, and reporting. Assisted in organising technical workshops, seminars, and competitions while ensuring transparency and proper fund allocation

PERSONAL DETAILS

Gender: Male

Marital Status: Single

Current Address: Pimpri Chinchwad, Pimpri-Chinchwad,
Maharashtra, India

Emails: sharib.tech1@gmail.com , 23511115dypit@dypvp.edu.in

Date of Birth: 26 Nov, 2004

Known Languages: English, Hindi, Marathi

Phone Numbers: +91-9889792085, +91-9889792085
